**JUNE 6 DINNER PROGRAM AT IVAR’S SALMON HOUSE: UPDATE: OUR WASHINGTON STATE FERRY SYSTEM**

Our June 6 dinner meeting at Ivar’s Salmon House will have David Moseley, Assistant Secretary Washington State Department of Transportation (WSDOT) Ferries Division, as speaker.

We, in Washington State, have the largest ferry system in the US moving cars and people across our waterways from islands to mainland to Olympic Peninsula areas. The Washington State ferries are a part of our state highway system.

David Moseley is the assistant secretary for WSDOT and leads the Ferries Division. David will speak about the state marine highway system which encompasses 23 ferries operating at 20 terminals on 10 routes. David graduated from Willamette University in Salem, Oregon. He has a Master’s of Divinity from Golden Gate Theological Seminary in Mill Valley, California. Prior to joining the Washington State Ferries, David served as a City Manager for three Washington state cities: Federal Way, Ellensburg and Steilacoom and as Director of the City of Seattle’s Department of Community Development. In February 2008, he was appointed his current position and head of Washington State Ferries.

David is focused on four primary goals for the ferry system: 1) completing the new ferry construction program, 2) containing costs, 3) implementing innovations in a cost effective manner to improve ferry operations, and 4) listening to customers and ferry-served communities about how best to improve ferry service.

Please come and listen to what is happening on our ferry boat waterfront and the changes and improvements in the future. This promises to be a very interesting and informative evening.

The Move Is On!

by Karen Marshall, Executive Director

As I write this on April 30, tables and chairs from the MOHAI library are being loaded into a moving van. By the time you read this, we will probably be moved to our new building in Georgetown and just beginning the unpacking process. We should have our office up and running sometime the week of May 1 but we expect our new Maritime Research Center within the MOHAI library to not be operating at full speed until July 1. Our phone number is expected to remain the same, but it will be forwarded from MOHAI. Let’s hope we don’t have any problems! Thanks for your patience and support.
