

Start your boat building here!

① Fold the paper in half.

③ Fold up both the flat edges against the triangle on each side.

② Then fold in two of the corners. (nearest to the folded edge to make a point)

④ Then open it out as if it was a hat. (you can even try it on if no one's looking!)

Press corner A against corner B and fold flat into a square.

⑤ Tuck in the flap on each side and fold each side upward to make another triangle.

⑥ Open up this triangle as you did before and push corner A to corner B again.

⑦ Now pull the two halves apart and your boat will pop up!

Why not decorate your boat with a fishy design!
